Last Call for Registration! Fall 2026 Government Affairs Update

That's a wrap! The California Legislature ended their 2025-2026 legislative session in the early morning of September 2. Please join the **Government Affairs** team for our **Webinar: Fall 2026 Government Affairs Update** to learn about the latest on legislation and regulations affecting the trucking industry.

You will learn about CTA's busy, productive year and our legislative wins:

- Killed the Governor's proposal to subsidize Sustainable Aviation Fuel Tax Incentive with diesel excise taxes
- Defeated multiple legislative attempts to pass different statewide indirect source rule proposals
- Negotiated amendments preventing the prohibition of in-cab cameras
- Narrowed a bill to exempt assessing fees for vehicles using existing commercial loading and unloading zones
- Supported a low-use NOx exemption for vehicles subject to Clean Truck Check
- Stopped a bill that would have eliminated in-depth economic analysis required for proposed "major regulations" in California that are expected to have an economic impact exceeding $50 million
- Worked with stakeholders to preserve CTA's past negotiations preventing local jurisdictions from assessing fees on vehicles based on weight
- Limited a bill's overreach by eliminating a provision that would have required heavy-duty battery electric vehicles to include bidirectional charging capabilities for transmitting power from a vehicle's battery to the electrical grid.

Attendees will have an opportunity to ask questions about legislation and regulations
