Request for Feedback on CFAC's Freight Mobility Plan 2027 Update

Dear Members:

CTA is requesting feedback for **Caltrans' California Freight Advisory Committee (CFAC) 2027 Freight Mobility Plan update**. This is an important opportunity to inform state freight planning officials about the trucking industry's infrastructure needs and help guide future transportation infrastructure investment and improvement opportunities.

Your input is important and appreciated.

Submit your feedback by June 27th to Nick Chiappe at **nchiappe@caltrux.org**. Responses will be compiled into a single document for submission to the agency prior to the June 30th deadline.

Questions

Significant freight mobility bottlenecks or deficiencies

Where are the most significant freight mobility bottlenecks or infrastructure deficiencies in the state that impact your business or agency, and what strategies should be prioritized to address them?

Actions to improve freight efficiency and reliability

What actions would most improve freight efficiency and reliability for your operations in California?

Specific issues or requirements

What specific issues or requirements within environmental regulations, rising operating costs, upfront technology cost, Weigh-in-motion devices, compliance costs, or workforce regulations, create the greatest challenges for your organization?

If the state could fix 1 thing...

If the State could fix one thing in the next 5 years, what would it be?

Data gaps

What critical data gaps limit your ability to operate efficiently in California?

Thank you for your time and participation.
